

Welcome to Vienna

We are very much pleased to invite you to attend the 39th annual Meeting of the Cervical Spine research Society-Europe from June 5– 7, 2024 in Vienna, Austria.

The Annual Meeting of the CSRS – Europe is the premier spine meeting exclusively devoted to cervical spine topics, an unrivaled opportunity to meet and hear from experts in cervical spine surgery, attend thrilling debates and 'round table'-as well as the most recent scientific evidence in treating cervical spine pathologies will be presented during this 3-day meeting.

The meeting will be held at the Parkhotel Schönbrunn in the centre of the attractive city of Vienna, Austria – in the heart of Europe. The historic city of Vienna, a city with century-long history of hosting international congresses, is centrally located in Europe with easy access to all major international airports.

One of the main topics of the meeting will be "Pathologies of the Pediatric Cervical Spine". As they are rare which results in limited evidence of ideal diagnostic and treatment guideline, representing challenging situations for orthopedics, trauma-surgeons and neuro-surgeons facing patients with them.

Renown specialists in this field will present their work and cases, to help surgeons in their daily practice in "Planning Surgery and Preventing Complications" – the second main topic of the meeting. As crucial for successful treatment, surgery and beyond, we are happy to present an inspiring guest lecture from someone who has to know how to survive – from a different approach and point of view.

Stay tuned!

Pre-Meeting Course— Challenging Cervical Spine Disorders

WEDNESDAY, JUNE 5, 2024, 18:00–22:00
VIENNA, AUSTRIA

Event Description

This year, we are pleased to offer in conjunction with our Annual Meeting, a Pre-Meeting Course on topics dedicated to treating challenging cervical spine disorders.

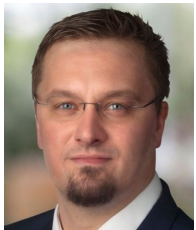

The objectives of this course are in-depth case discussions with highly experienced cervical spine surgeons and peers.

This course offers you a challenging learning experience with interactive sessions facilitated by faculty in their field of expertise.

Cases are discussed in small workgroups, and an iterated process for case solutions will be created with the audience.

A dedicated workshop session allows participants to practice the techniques on dry bones.

We are looking forward to engaging discussions and interesting exchanges.

Heiko Koller
Chairperson

Peter G. Passias
Co-Chairperson

Target Participants

This event is targeted at experienced spine surgeons (orthopedic surgeons, neurosurgeons and other specialists) who are aiming to further improve their performance using innovative surgical techniques in the management of complex cervical spine surgery.

Faculty

- Heiko Koller, Bad Abbach, Germany
- Peter G. Passias, New York, USA
